LUSTRE

On a peu recours au lustre dans les maisons des particuliers. En raison de son efficacité et de ses dimensions souvent imposantes, il convient mieux aux églises et aux grandes maisons. Les plus petits et les plus communs sont en bois ou en fer-blanc; d'autres, également en bois, en fer-blanc ou en fer forgé, sont cependant recouverts de feuilles d'or et peuvent supporter jusqu'à trente-six chandelles.

Québec, vers 1800. SMCC, A-1563. Photo : Harry Foster.
